

Biopro

SPRING AWAKENING

Registration number for
conventional fertilizers

0040224/23

COMPOSITION

Total Nitrogen (N) 11%

Ureic Nitrogen (N) 11%

Phosphoric anhydride(P_2O_5) 8%
water soluble

Acetic acid

C.P CHARACTERISTICS

pH 1.05 +/- 0.5

Density 1.20 +/- 0.5

Color Colourless

Smell Weakly Acetic

Solubility Completed

FORMULATION

Liquid

CLASSIFICATION

Danger

PACKAGING

Tank 10 L

Tank 20 L

APPLICATION

FERTILIZER SOLUTION NP 11-8

Main features:

BIOPRO is a specific fertilizer for vegetative awakening, with a nutritive action. Provides nitrogen and phosphorus that are quickly assimilated, improving the quality of budding, flowering and fruit set, ensuring uniformity in plant development. It promotes the development of a luxuriant crown and a more generous production, enhancing the color, flavor and aroma of the fruits.

Mechanism of action

BIOPRO supports synchronized sprouting thanks to its oxidative action, which releases the buds from the peduncles, and the phosphatic component, which strengthens plant tissues by increasing cell density. The nutritional action activates energy processes and improves calcium absorption through radical stimulation and phytoalexin production, while the acidic component promotes the detachment of dead tissues, contributing to the elimination of potential pathogens.

INSTRUCTIONS FOR USE

- Fruit [pome fruits (apple, pear etc.), stone fruit (apricot, peach, cherry, etc.), Actinidia (kiwi)]: 300/500 ml/hl
- Grapes / olive: 300/500 ml/hl
- Shake well before use
- Apply the product evenly
- Particularly suitable in the vegetative recovery phase
- It is advisable to test some plants for varietal tests before treating the whole surface
- Reapply the product if necessary

Made in Italy
