

Cleaning

EQUIPMENT CLEANER

LIQUID EQUIPMENT CLEANER WITH CHANGE OF DIRECTION INDICATOR

Main features:

CLEANING is a liquid cleaner specific for plant growing equipment, ideal for the rapid removal of impurities, complete cleaning and surface hygiene. Thanks to its strong oxidative power and the speed of action, it is particularly suitable for spraying barrels and nozzles, ensuring immediate use for subsequent treatments.

Mechanism of action

CLEANING acts by rapidly oxidizing impurities, cleaning and deep sanitizing the treated surfaces. The Turn indicator signals the effectiveness of the process, ensuring optimal results in a short time.

COMPOSITION

Potassium permanganate
Phosphatic salts

C.P CHARACTERISTICS

pH 10.50 +/- 0.5
Density 1.30 +/- 0.5
Color Purple
Smell Characteristic
Solubility Completed

FORMULATION

Liquid

CLASSIFICATION

Attention

PACKAGING

Bottle 1 L
Tank 10 L

APPLICATION

INSTRUCTIONS FOR USE

Fill the cask with 50-100 L of water, start stirring and dose 150-250 ml of product which will colour the water violet. Then circulate the solution in the system and tubes until it turns brown. Finish by rinsing thoroughly.
